Objective: To obtain a cybersecurity internship, applying hands-on experience in network engineering, web development, and security-focused problem solving to contribute to real-world security operations.

EDUCATION

Bachelor of Science in Information Technology

Expected Graduation: May 2026

First City Providential College

Completed comprehensive coursework in software development, web technologies, networking, databases, and system administration. Developed practical skills through team-based projects, hands-on labs, and real-world problem-solving activities.

SKILLS

Programming: Python, JavaScript (Node, React, Express), RESTful APIs, MongoDB, SQL

Networking: TCP/IP, Routing & Switching, Cisco IOS configuration & troubleshooting, Security

Software: Git/GitHub, Bash/Shell, Burp Suite, Wireshark, Linux, Windows

Languages: Filipino, English

EXPERIENCE

Member of FCPC/CSS Extra-curricular Software Development Team

Nov 2024 - Present

FCPC College of Computer Studies

Collaborate with a team of developers to design, develop, and maintain software projects beyond the academic curriculum.

EXTRACURRICULAR ACTIVITIES

Cisco CCNA Capture-the-Flag Competition 2026

Jan 16, 2026

Cisco Networking Academy

Our team emerged as the champion in the CISCO Networking Academy Capture-the-Flag competition, showcasing strong skills in network security, problem-solving, and practical cybersecurity challenges.

AI Hackathon - Cyber Defenders

Oct 26, 2025

HexcoreLabsPH

Participated in AI Hackathon by Hexcore Labs PH at the Asian Institute of Management, developing an automation tool to protect Gmail from malicious emails, demonstrating skills in cybersecurity and AI integration.

NextGenPH: Youth Innovators Reimagining Public Service Contest

Nov 11, 2025

Development Academy of the Philippines

Developed a mobile application recommending nearby tourist spots using AI-driven personalized suggestions, demonstrating skills in mobile development, AI integration, and user-focused design.
